DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-5, 7-15, 17-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 6,523,496.

Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the issued patent differs from the independent claim 1 of the instant application only by omitting the step of continuing the confinement of the poultry for a length of time. As the poultry are confined in the instant application (as disclosed by the placing the poultry and removing the poultry from the space), the methods are not considered to be patentably distinct as any time of confinement meets the patented step of continuing the confinement.

Allowable Subject Matter

3. Claims 1-5, 7-15 and 17-27 would be allowable if a timely filed terminal disclaimer in compliance with 37 CFR 1.321 (c) were submitted.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art teaches the use of a citrus bi-product in the production of a litter component (such as House, 5,230,305) but not in the percentage or in the process as claimed. Taylor, US 5,960,743 discloses the use of a litter component and noting the footpad lesion scores for the poultry. However, Taylor does not disclose the use of a citrus bi-product in the litter and the use of such a litter would be construed as improper hindsight. As such, the prior art does not teach nor readily suggest the process as claimed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Taylor (US 5,960,743), Kiebke (US 5,526,770), House (US 5,230,305).
